**Description :** Description du produit "The first day at college, my professor dropped dead. The second day, I assisted at his autopsy. Let's hope I don't have to go through four years of this...." When Jenna Blake starts her freshman year at Somerset University, she's not only living on her own for the first time, she's moving closer to the father she never really knew. It's an exciting time, filled with new faces and new challenges, not to mention parties and guys and...corpses? Jenna feels torn about her future. She'd like to be a doctor like her mother, but she can't stand the sight of blood. Her father, a criminology professor, thinks he has the answer and sends her to interview for a job with the medical examiner -- an interview that takes place in the middle of an autopsy. When a congressional aide goes violently insane and then drops dead, the pathology team at Somerset Medical Center discovers that his brain was ravaged with disease -- and loaded with insect larvae.

As Jenna starts her new job, she is drawn into a web of terrifying disease, dangerous politics, and intriguing mystery. And when one of her professors ends up dead, she starts making connections even the police haven't seen...connections which will bring her face to face with a pair of killers: one medical, and one all too human.

Prsentation de l'diteur"The first day at college, my professor dropped dead. The second day, I assisted at his autopsy. Let's hope I don't have to go through four years of this . . ."When Jenna Blake starts her freshman year at Somerset University, she's not only living on her own for the first time, she's moving closer to the father she never really knew. It's an exciting time, filled with new faces and new challenges, not to mention parties and boys and . . . corpses?Jenna is torn about her future. She'd like to be a doctor like her mother, but she can't stand the sight of blood. Her father, a criminology professor, thinks he has the answer -- and sends her to interview for a job with the Medical Examiner -- an interview that takes place in the middle of an autopsy!When a congressional aide goes violently insane, and then drops dead, the pathology team at Somerset Medical Center discover that his brain was ravaged with disease -- and loaded with insect larvae.

When Jenna takes on her new job, she is drawn into a web of terrifying disease, dangerous politics, and intriguing mystery. And when one of her professors ends up dead, she starts making connections even the police haven't seen . . . which will bring her face to face with a pair of killers, one medical, and one all too human.From Publishers WeeklyJenna Blake has greater concerns than making friends or choosing a major during her first semester at Somerset University near Boston. At her parents insistence, she accepts a job as an administrative assistant to the medical examiner at Somerset Medical Center; her new position gives Blake insightAvia Golden's (Ghost Roads) well-rendered autopsy descriptionsAinto some bizarre campus events involving people suddenly seized by uncontrollable violence. Unwittingly at the center of an international conspiracy (which draws the attention of the FBI and the Centers for Disease Control), Blake is marked by a killer whose technique demonstrates Golden's sense of the truly morbid and her knack for uncomfortably realistic medical dialogue. The college atmosphere lends itself to the unpredictable plot, and Golden does well in developing the personalities of minor characters, including Jenna's new college friends, her parents and her supervising doctor. The killer and his motive, on the other hand, are never fully developed. Jenna will be back soon, however; this title launches Golden's Body of Evidence series.
