Description :

Prsentation de l'diteurWHAT IF THERE WERE EVIDENCE OFA GREAT ARCHITECT?WHAT IF ONE NUMBER - 366 - WERE ENCRYPTEDIN THE VERY BIOLOGY OF THE HUMAN BODY AND THE PHYSICS OF THE EARTH?And what if the greatest rock song of all time, Stairway to Heaven, were the first key to decrypt the worlds deepest secret?When Arthur, Peter and Thi Mi Linh, three brilliant British students from Avebury, Wiltshire, find a series of riddles in their pockets, they first dismiss them as a practical joke. But as their investigations lead them to an ancient 366-degree geometry based on the Earths fundamental data, they start wondering.More bewildering still, as they start to find the missing pieces of the puzzle, they begin to grasp the meaning of this five-millennium-year-old secret once held by Jesus Christ or King Arthur, and to envision the far-reaching implications of an incredibly clever system which lies at the

core of the worlds history. When death strikes, killing one of their best friends, they realise their lives are in serious danger. So they set off for France, following the path of the ancient druids to seek a lost city in a hope to find answers to their questions. **THE BOOK THAT MIGHT CHANGE YOUR VISION OF THE WORLD FOREVER** Presentation de l'auteur **WHAT IF THERE WERE EVIDENCE OF A GREAT ARCHITECT?
